Product Discontinuation Notice!

Model 8500MA Pulse Oximeter No Longer Available

It was announced several months ago that the models 8500A, 8500MA and 8500AV were going to be discontinued on June 1, 2008. It was decided to obsolete these products completely and offer any remaining inventory at special pricing.

On December 8, 2008 Nonin Medical *ran out of remaining inventory of the 8500MA* due to strong demand from our special sales promotion and is no longer available. However, we still have the following quantities available for sale while supplies last:

- 8500A – Alarm (188 units)
- 8500AV – Alarm Veterinary (81 units)

As noted in previous Nonin News Flashes released in October, there is special pricing available *while supplies last* for these units. The 8500A will be available at a significant savings of \$250 for distributors, and the 8500P will be available for a distributor price of \$175. These products will continue to carry their full warranty.

The 8500 and 8500M will continue to remain available for sale.

If you have any questions, please feel free to contact me at 763.577.2657. Thank you for your continued support of Nonin Medical.
